🏠 Address: House No.: 8-43/8/U/5/8/1, Road No. 8, East Balaji Hills Colony, Boduppall, Hyderabad, Telangana - 500039.

OBJECTIVE:

Looking for a challenging career which demands the best of my professional ability in terms of technical and analytical skills, helps me in broadening and enhancing my current skill and knowledge and use my organizational skills, educational background and ability to work well with people.

PROFESSIONAL SUMMARY:

- Technically Sophisticated IT Professional with 10+ years of experience in Banking and Finance, Tele-Communication domain in area of **SRE, Automation, DevOps, Process improvement, Build & Release, Development and Service Delivery.**
- Proven ability to identify problem, analyze possible solutions and determine best course of action to meet objectives when required in extremely critical conditions (like **Triages** and **call to work**).
- Dexterity in grasping new technical concepts and utilizing the same in a productive manner.
- Good interpersonal and technical skills and effective communication with stakeholders.

EDUCATIONAL ACADEMIA:

- **Bachelor of Engineering (June 2015)**
Dept. of Electronics Engineering, Walchand Institute of Technology, Solapur
Secured **78.87 %** (Aggregate %) in Final Year in Solapur University.
- **Diploma in Electronics and Tele-communication (June 2012)**
Dept. of Electronics and Telecommunication, Anjuman Polytechnic, Nagpur.
Secured **80.34 %** (Aggregate %) in Maharashtra State Board of Technical Education (MSBTE).
- **Secondary Examination (June 2009)**
Hindu Dyanpeeth Convent, Nagpur.
Secured **74.61%** in Maharashtra State Board of Secondary Education (MSBSE).

AWARDS AND ACHEIVEMENTS:

- Received '**Silver awards**' three times for enhancing the stability and reliability of the CSP application and delivering the integration of Cyber/Fraud capabilities in CPB-Inview Teams.
- Received '**Bronze awards**' five times for identifying and onboarding Monitoring tools and work on the automation, CI-CD and delivery in CPB-Onboarding and Investment and Fund Teams.
- Received '**Performance Kudos**' for identifying and work in the automation and process improvement in IdP Operations Teams.
- Completed '**SPLUNK 7.x Fundamentals part 1**' Certification.
- Received '**Pat on Back**' and '**SPOT for Excellence**' award for being Key Contributor in Mediation Infra team and for consistent error free and timely deliveries and actively working in automation area.
- Received **Golden Grade Certificate** for completing '**ELITE**' program during the period of Induction Training.
- Secured **Rank #1** in the Final Year of Graduation in the Dept. of Electronics Engineering, Solapur University.

PROFESSIONAL EXPERIENCE:

Company Name: Citicorp Services India Pvt. Ltd. (Citibank)

[Feb'22 Onwards]

Current Designation: Officer – C11 (Role – Engineer Intermittent Analyst)

Project: CITI WEALTH SERVICES - CLIENT SERVICE PLATFORM (CSP) – Application Support and SRE

Project Description: Client Service Platform (CSP) is a mission-critical wealth enterprise application used to capture, validate, approve, and process client financial orders before transmitting them to the Enhanced Banking System (EBS) for execution. The platform integrates with multiple banking systems to manage transaction processing, client data, reporting, audit trails, business rules, approvals, and regulatory compliance. It supports end-to-end order lifecycle management while ensuring secure, reliable, and high-performance financial operations.

Responsibilities and Contribution:

- Provided end-to-end **Application Support** as an **SRE** for the Client Service Platform (CSP), ensuring **high system availability**, stability, and seamless execution of financial transactions while consistently meeting **SLA** and business continuity requirements.
- **Managed the complete transaction lifecycle** by supporting order validation, MQ message processing, integration with the Enhanced Banking System (EBS), and synchronization with downstream applications, ensuring accurate and reliable transaction processing.
- Proactively **monitored application performance** using **SLI/SLO** dashboards integrated with KPI dashboards, while overseeing interfaces, batch jobs, and system integrations.
- Performed **incident troubleshooting** and **Root Cause Analysis (RCA)** to minimize downtime, improve service reliability, and prevent recurring production issues.
- **Improved operational efficiency** by creating knowledge articles, operational run books, and troubleshooting documentation, while contributing to **continuous process improvements**, **production stability**, and **enhanced application monitoring** and support effectiveness for mission-critical banking applications.

Key Contributions:

- **Maintained high availability and operational stability** of a business-critical banking platform supporting end-to-end financial transaction processing.
- **Reduced incident resolution time** through effective monitoring, log analysis, root cause investigation, and cross-functional collaboration.

Project: CITI - PRIVATE BANKING WEALTH MANAGEMENT – Platform Engineering [**SRE, Development and Env Support**].

Project Description: Citi Private Bank is dedicated to helping dynamic individuals and their families preserve and grow their wealth. Our clients include some of the world's leading entrepreneurs, executives, investors and their family offices. We provide customized private banking that crosses borders, including some sophisticated services usually reserved for major global institutions.

Responsibilities and Contribution:

- **Real-Time operational Insight (ROI) Application Development**

Role: Python Backend Developer (SRE Team)

Key Contributions:

- **Problem Statement Analysis:** Conducted in-depth analysis of business transaction logs available in Splunk to identify operational inefficiencies and system bottlenecks.
- **Anomaly Detection:** Designed workflows for studying anomalies in business transactions, enabling proactive identification of potential issues affecting operational performance.
- **Application Development:**
 - Developed backend systems to onboard various business transactions by extracting, processing, and integrating relevant log data from Splunk using Webhooks.
 - Engineered robust data pipelines for processing and storing transaction data in databases, ensuring scalability and low-latency processing for real-time insights.
 - Automated data pre-processing workflows to standardize incoming data from diverse application logs, ensuring consistency and reliability for downstream analytics.
- **UI Data Integration:** Collaborated with UI teams to deliver processed data for visualization, empowering stakeholders with actionable real-time insights.
-

▪ **DevOps and Automation:**

- Developed reusable automation scripts and templates for provisioning resources, rolling out new features, and deploying tools.
- Managed CI/CD pipelines to enable frequent and reliable application deployments, improving development cycle efficiency.
- Used Python to create monitoring scripts that check service availability (e.g., backend processes, REST APIs, MongoDB) and send alerts for proactive resolution.
- Installed, configured, and maintained DevOps and monitoring tools like Splunk Forwarders, AppDynamic agents, and Evolven to enhance system observability and ensure seamless application performance.
- Upgraded platform software and tools as part of end-of-version migrations, ensuring compatibility with modern tech stacks. Automated and optimized batch workflows to streamline daily operational processes and reduce failure rates.

Company Name: Transcend Street (India) Pvt. Ltd.

[July'21 – Feb'22]

Designation: Senior Software Engineer (Role - Release and DevOps Engineer)

Project Description: Transcend Collateral, CCP & Inventory is a mission-critical **Capital Markets** and **Financial Services** platform that enables financial institutions to optimize collateral inventory, maximize liquidity, and reduce funding and operational costs through advanced algorithmic and rules-based processing. The platform supports **real-time processing**, collateral optimization, securities inventory management, central counterparty (CCP) workflows, and enterprise-wide collateral operations for **critical Trading and Collateral applications**, ensuring **high availability**, scalability, and operational resilience across trading and post-trade ecosystems.

Responsibilities and Contribution:

- Managed CI/CD pipelines on-premises and in AWS, ensuring smooth, reliable, and consistent software releases.
- Automated resource provisioning, tool deployments, and operational workflows with custom scripts and templates, improving efficiency.
- Designed tools and implemented processes to automate application operations and streamline issue resolution.
- Monitored systems, provided operational support, and resolved deployment and installation issues in collaboration with cross-functional teams.
- Coordinated with third-party vendors for timely repairs and handled hardware fixes to maintain system stability.
- Ensured consistent software builds, assisted in troubleshooting infra and application issues across environments.

Company Name: FIS Solutions (India) Pvt. Ltd.

[March'19 – July'21]

Designation: Service Delivery Analyst (Build and Release Engineer).

Project Description: The **Infinity Identity Provider (IdP)** is a mission-critical **IAM** platform supporting **Banking Domain** and **Financial Services** applications. It provides secure **authentication**, **authorization**, **Multi-Factor Authentication (MFA)**, **Single Sign-On (SSO)**, identity federation, and entitlement management for **wealth enterprise applications** operating in **real-time processing** environments. Built on a secure **multi-tenant architecture**, ensuring **high availability**, scalable, low-latency access, and secure identity services for wealth and financial services ecosystems.

Responsibilities and Contribution:

- Automated CI/CD pipelines using Jenkins, Docker, and Octopus Deploy, integrating regression testing and deployment processes to minimize manual effort and errors.
- Administered QA, UAT, and production environments, including patching, application upgrades, and MySQL database management with Percona replication fixes.
- Implemented monitoring, health checks, and logging strategies using Splunk to enhanced system reliability.
- Collaborated with stakeholders to plan releases, design scalable, reliable build and release processes.
- Automated build and deployment using Jenkins & Ansible to reduce toil and speed-up production upgrade.
- Successfully reduced sanity execution process time by 21 hours using Docker.
- Created SPLUNK Dashboards to analyze the application performance and generate KPI reports.

Company Name: Tech Mahindra Ltd.

[Nov'15 – Mar'19]

Designation: Software Engineer

Project: AT&T LTE Production Support (Mediation INFRA) [**Client:** AT&T Services Inc., USA]

Project Description: Mediation application collects, processes and distributes usage data of Voice, Internet, 3G/4G/LTE, MMS, SMS, VoIP etc. Mediation is a mission critical and mainstream application which generates revenue for AT&T. Mediation is the connecting link between a telecom network that enables a user to make a call, and the billing system that bills the user for that call. It processes and enhances CDR's (call detail records) before sending it for billing or different down streams. Various streams involved like Voice, Data and VOIP.

Responsibilities and Contribution:

- Managed **end-to-end operations** of Production and Non-Production Mediation environments, including environment provisioning, release deployments, maintenance, outage resolution, **SLA management**, and operational support for mission-critical telecom applications, ensuring **high availability, operational excellence**, and service reliability. Planned and executed production releases in collaboration with **AT&T Release Management**, Development, Infrastructure, Application Support, and business stakeholders, demonstrating strong **cross-functional collaboration, stakeholder management, quality assurance**, and adherence to release governance and deployment best practices.
- Built and administered Production and QA Linux servers for VoLTE Mediation applications, including RPM installation, Pacemaker cluster configuration, MVS-LE architecture, orchestration scripting, and **Disaster Recovery (DR) / Business Continuity Planning (BCP)** failover activities to ensure resilient infrastructure.
- Developed **Shell scripts** to automate repetitive operational tasks, standardize deployments, optimize system administration, and drive **process improvement, continuous improvement**, automation, and operational efficiency, significantly reducing manual effort and improving deployment productivity.
- Led **incident coordination** during production outages by collaborating with Infrastructure, Network, Database, and Application teams to restore services within SLA timelines, performing **Root Cause Analysis (RCA)**, monitoring application health, system performance, and operational **KPIs**, while preparing incident, deployment, and SLA **reports** to support **performance monitoring**, reporting, and continuous service improvement.

TECHNICAL SKILLS:

- **Programming:** Python, Linux, Shell Scripting, Ansible Playbook, Java (w.r.t. CI-CD).
- **Database:** SQL, MySQL, MongoDB.
- **Automation/DevOps Tools:** GITHUB Actions, Jenkins, Udeploy, Teamcity, GIT, Docker.
- **Application Server:** Apache Tomcat, Apache HTTPD (AHS) and Nginx.
- **Ticketing Tool:** WEBTRAX, Jira, and ServiceNow.
- **Monitoring Tool:** SPLUNK, ELK, AppDynamic
- **Learning Interest:** Terraform, Kubernetes, and Microsoft Azure.

SOFT SKILLS:

- Energetic and highly ethical in all work-related assignments thus able to immediately contribute to corporate goals and objects. Possess good team skills, coordination capabilities.
- Strong verbal, written communication, and Analytical thinking with good business acumen.

HOBBIES AND INTEREST:

- Photography.
- Riding bicycle and travelling.
- Playing cricket and Badminton.

DECLARATION:

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars.

(JOY LAXMAN MARCHATTIWAR)
